

CJ Bangert

EDUCATION:

University of Maryland | College Park, MD

Graduated: May 2020

B.S in Computer Science and a Minor in Technology Entrepreneurship

- Hinman CEOs Program: 2-year Living-Learning program intended to develop business development skills, particularly dealing with startups.
- Public Leadership Scholars Citation: 2-year program aimed at developing leadership/project management skills, along with Public Policy coursework. Culminated in a capstone where I led a small oyster restoration project.

PROFESSIONAL EXPERIENCE:

Second Pillar Consulting

Feb 2024-Present

Software Engineer Consultant

- Collected client requirements, designed and developed Python Modules for analyzing bank data. Utilized libraries such as StatsModels, Scipy, Numpy, SKLearn, Pandas and more.
- Engineered a model search tool to fit and evaluate models on various variable combinations to find the best fit. This tool does this in multiple processes, depending on the user's CPU architecture.
- Contributed to a Django Application for streamlining credit reviews.

Bangert-Richard

Oct 2023-Jan 2024

Cofounder

- Co-founded company to explore SBIR topics
- Focused on drafting a proposal for a topic involving sentiment analysis on social media for USSOCOM

Itos Finance

Nov 2022-Oct 2023

Full Stack Software Engineer

- Designed and built resolver smart contract (Solidity) to interpret instructions, route trades and transfers for efficient liquidations.
- Designed and built liquidator application (Python) and smart contract.
- Various peripheries, integrations, and analysis (Python, Solidity, Typescript React, Jupyter Notebook)
- Contributed to discussions involving product roadmap, fundraising, marketing, and business development.

Gnosis Builders

June 2022-Sept 2022

3-month Fellowship

- Created new Dune Analytics dashboards to better visualize on-chain activity and trends for Gnosis Chain
- Updated and enhanced Gnosis documentation for new documentation site. Primary focus was around documenting how the bridge applications operate and their design limitations after the engineering team left.
- Solved a bridge production issue with the knowledge gained from writing documentation.

M&T Bank | Remote/Wilmington, DE

Aug 2020 -May 2022

TDP Software Engineer

- Collaborated with product owner to architect and implement a Risk Scoring application (Python, Flask, SQL Server, TSQL, C#, Javascript and .NET) to calculate numerical risk scores to outgoing wire transactions.
- Led CI/CD initiative for AGILE team.
- Provided production support for multibillion dollar Wire/Check/ACH transfers.
- Managed administrative responsibilities for rotational program dealing with campus recruiting.
- Integrated and warehoused financial data from various data firms in a new Collective Investment Trust application in a fault tolerant manner (.Net Core 5, SQL Server, RedHat Openshift, Steeltoe Hystrix)
- Manage relationships with domestic and international vendors for integration support.
- Collaborate with business stakeholders and AGILE team to architect and build the new Collective Investment Trust management platform (.Net Core 6, SQL Server, Angular TypeScript)

Contract Software Engineer

- Charged with developing and maintaining the Integration Test suite (Java with Spring libraries, Apache Maven, Gherkin) for the John Deere Custom Performance (JDGP) platform, spanning over 80 REST Microservices
- Identified and fixed issues pertaining to global system integration.

Triangle Experience Group | Arlington, Virginia

Summer 2018

Software Engineering Intern

- Implemented mitigations in the source code (in C) for vulnerabilities exposed by the HP Fortify scan.
- Achieved ahead of schedule and within the first month of my start date.

Emerge A.T.S.

2012-2017, 2024

I.T. Technician (Part time)

- Configured office network
- Managed computer software updates and installs
- Website design and maintenance (2024)

Projects/Freelance Work:

Succinct Labs

Oct-Nov 2022

- Implemented a zero-knowledge proof verifier (Groth16s) in a Cosmos module to be used for a blockchain interoperability application (Go, Typescript).

Tsunami Finance

May 2022

Full-Stack Web3 Software Engineer (Front-end focused)

- Created a decentralized exchange where users could trade the Luna/UST pair on the Terra blockchain using an automated market maker (AMM)
- Integrated front-end trading view and functionality (Javascript, React) with smart contracts (Rust)
- Identified bugs in smart contract and implemented fixes.

Uptahr LLC - Paradigm LABS

Sept-Oct 2021

- Rapidly collected requirements, architected, and built backend services for founder education platform MVP in 3 weeks (Django, GraphQL, PostgreSQL, React, AWS)
- Notable features of the platform include an article recommendation service and the ability to create teams with various user roles.

TECHNICAL SKILLS:

Programming Languages

- C#, Java, Python, Solidity, SQL, TypeScript, JavaScript, C, Rust, C++, HTML, CSS

Frameworks, Tools and Technologies:

- .NET Core, SQL Server, Foundry (Solidity Framework), Flask, Django, PostgreSQL, React, Angular, Spring, Linux/Unix Operating Systems, IBM DB2, MongoDB, GraphQL, RedHat Openshift, Gherkin, Git, Node.js, Express.js, Gitlab, Jupyter Notebook

Other Skills

- Extensive coursework in Machine Learning, Computer Vision, and Bioinformatic Algorithms
- Experience with Web Scraping, Data Tidying, Modeling, and Analysis
